

Preface to the first issue of SJORANM

To our Readers

Radiology offers a steadily expanding range of diagnostic and minimally invasive therapeutic methods. Together with diagnostic and therapeutic nuclear medicine, these techniques have become essential components of high-quality patient care in close cooperation with clinical disciplines.

Our new journal, the Swiss Journal of Radiology and Nuclear Medicine (SJORANM), aims to provide rapid online access to new ideas, scientific research, and findings in diagnostic and therapeutic radiology and nuclear medicine.

By making important medical information available at the right time and in the right place, we are committed to advancing patient health and healthcare. Whether readers face time constraints in clinical practice or are building a scientific career, we aim to support science, training, continuing medical education, patient care, teaching, radiological diagnosis and therapy, and patient-oriented, evidence-based, independent research.

To contribute meaningfully to patient benefit, we want to provide healthcare professionals with greater confidence in their daily work and the freedom they need to focus on what matters most: making well-informed decisions based on the advances that radiology and nuclear medicine can offer their patients.

Dr. med. Frank Mosler, Associate Editor
Prof. Dr. med. Gerd Nöldge, Editor-in-Chief
